Pulse Analytics App - User Guide (version 3.2)

1. Overview

Pulse is Northwind's web analytics app for small online stores. It tracks visitors, orders and revenue, and shows them on a single dashboard.

Pulse 3.2 was released in August 2026. It added cohort retention charts and a CSV export for every report.

2. Plans and Limits

The Free plan covers up to 10,000 tracked events per month and keeps data for 30 days.

The Growth plan costs Rs. 2,499 per month, covers up to 500,000 events per month and keeps data for 13 months.

The Scale plan is priced on request, has no event limit, keeps data for 5 years and includes a dedicated account manager.

When a workspace goes over its monthly event limit, Pulse keeps collecting data for 7 days and then pauses tracking until the next billing cycle or an upgrade.

3. Installing the Tracking Script

To start tracking, copy the tracking snippet from Settings > Installation and paste it just before the closing head tag of every page.

Shopify stores can install Pulse from the Shopify App Store instead, which adds the snippet automatically.

After installation, data usually appears on the dashboard within 15 minutes. If nothing appears after 1 hour, check that ad blockers are disabled and use the Verify Installation button.

4. Dashboards and Reports

The default dashboard shows visitors, conversion rate, orders and revenue for the last 7 days.

Conversion rate in Pulse is defined as orders divided by unique visitors in the selected period.

Reports can be exported to CSV from the three-dot menu on any chart. Scheduled email reports can be sent daily, weekly or monthly to up to 10 recipients.

5. Team and Access

Pulse has three roles: Owner, Admin and Viewer. Only the Owner can change billing details or delete the workspace.

Admins can invite new users and edit dashboards. Viewers can see dashboards and export reports but cannot change anything.

Single sign-on (SSO) with Google Workspace or Okta is available on the Scale plan only.

6. Support

Free plan users get support through the community forum. Growth plan users get email support with a response within 24 hours on working days.

Scale plan users get priority support with a 2-hour response time, 24 hours a day, 7 days a week.
